BANK DHOFAR S.A.O.G.

THE BOARD OF DIRECTORS' REPORT FOR THE QUARTER ENDED

30th June 2018

Dear Shareholders,

On behalf of the Board of Directors of Bank Dhofar S.A.O.G., I am pleased to present to you the Bank's Financial Statements for the quarter ended 30th June 2018.

The Bank's Financial Performance during first half of 2018

The bank posted a net profit of OMR 24.949 million for the first half of 2018 compared to OMR 22.694 million same period last year, registering a year-on-year growth of 9.94%. Net Loans, Advances and Financing to customers' is at OMR 3.126 billion as at 30th June 2018, compared to OMR 3.113 billion at the end of 30th June 2017, 0.42% increase. Customer Deposits, including Islamic deposits registered a growth of 4.73% to reach OMR 3.119 billion as at 30th June 2018 as compared to OMR 2.978 billion as at 30th June 2017.

Net interest income and income from Islamic Financing activities for the six-months period ended 30th June 2018 stood at OMR 48.32 million compared to OMR 46.00 million for the first half of 2017, an increase of 5.04% year-on-year. Moreover, Non-interest income such as fees and commissions, foreign exchange profit, investment income etc. grew by 5.25% reaching OMR 17.04 during the 6-month period ended 30th of June 2018 million as against OMR 16.19 million for the same period last year. Total operating income reached OMR 65.36 million during first half 2018 as against OMR 62.19 million for the corresponding period of 2017, an increase of 5.10%.

Operating cost to Operating Income ratio for the six-months period ended 30th June 2018 is at 50.72% as compared to 46.99% during the same period in 2017.

Net provisions for loan impairment improved by 62.04% to OMR 2.38 million for the six-month period ended 30th June 2018 as against OMR 6.27 million during the same period of last year mainly due to recent changes in provision (Expected Credit Loss) calculation in compliance with International Financial Reporting Standards 9 (IFRS-9). Non-performing loans to gross loans ratio increased from 2.92% as at 30th June 2017 to 3.44% as at 30th June 2018, while Non-performing loans, net of interest suspense, to gross loans ratio stood at 1.86% as at 30th June 2018 as against 1.59% during the corresponding period of year 2017.

The earnings per share (EPS) for the 6-months period ended 30th June 2018 are 0.009 similar to corresponding period of year 2017 of OMR 0.009.

- Best mobile app from Pan Arab Web Awards 2018
- Best Private Bank Oman 2017 – BankDhofar by Global Banking & Finance Review

Corporate Social Responsibility (CSR):

The Board of Directors contributed OMR 1 million in a demonstration of Bank's support to the citizens in Dhofar and Wusta governorates to support the repair and restoration efforts for the damages caused by Cyclone Mekunu that hit Dhofar region in May 2018.

Within the same context, BankDhofar also offered loan instalment deferments for customers in Dhofar Governorate as support to the affected families.

BankDhofar has always been at the forefront in providing support to the community and continue delivering on its commitment to innovating strategic sustainable CSR initiatives ensuring lasting positive benefits to the local community.

Acknowledgment

On behalf of the Board, I would like to thank our valuable customers for their patronage and confidence reposed in the Bank. I thank the shareholders for the continuous support and the Bank’s diligent staff and management for the good performance during the period.

The Board of Directors also thanks the Central Bank of Oman and the Capital Market Authority for their valuable guidance to the local banking sector and the listed companies

Finally, the Board of Directors and all staff of the Bank would like to express our most sincere gratitude to His Majesty Sultan Qaboos Bin Said for his wise leadership and generous support to the private sector.

Eng. Abdul Hafidh Salim Rajab Al-Aujaili
Chairman

NOTES TO THE INTERIM CONDENSED FINANCIAL STATEMENTS
FOR THE SIX MONTH PERIOD ENDED 30 JUNE 2018

1. LEGAL STATUS AND PRINCIPAL ACTIVITIES

Bank Dhofar SAOG (the "Bank") is incorporated in the Sultanate of Oman as a public joint stock company and is principally engaged in corporate, retail and investment banking activities through a network of 70 branches (30 June 2017: 68 branches) which comprises of 10 Islamic branches (30th June 2017: 10 Islamic branches) and 60 conventional branches (30 June 2017: 58 conventional branches). The Bank's Islamic Banking Window, Maisarah Islamic Banking Services has an allocated capital of RO 55 million from the core paid up capital of the shareholders. The Bank has a primary listing on the Muscat Securities Market ("MSM") and the Bank's Perpetual Tier 1 Capital Securities are listed on Irish Stock Exchange. The principal place of business is the Head Office, Capital Business District ("CBD"), Muscat, Sultanate of Oman.

The Bank employed 1,570 employees as of 30 June 2018 (30 June 2017: 1,486 employees).

2 BASIS OF PREPARATION

2.1 Statement of compliance and basis of accounting

The unaudited interim condensed financial statements for the six month period ended 30 June 2018 of the Bank are prepared in accordance with International Accounting Standard (IAS) 34, 'Interim Financial Reporting', applicable regulations of the Central Bank of Oman (CBO) and the disclosure requirements set out in the Rules and Disclosure and Proformas issued by the Capital Market Authority (CMA).

These unaudited interim condensed financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting, and should be read in conjunction with the Bank's last annual financial statements as at and for the year ended 31 December 2017 ('the last annual financial statements').
They do not include all the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Bank's financial position and performance since the last annual financial statements.
This is the first year Bank's financial statements where IFRS 15 and IFRS 9 have been applied. Changes to significant accounting policies are described in Note 3.

2.2 Functional and presentation currency

Items included in the Bank's financial statements are measured using Rial Omani which is the currency of the primary economic environment in which the Bank operates, rounded off to the nearest thousand.

2.3 Use of estimates and judgments

In preparing these interim condensed financial statements, management has made judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgments made by management in applying the Bank's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements as at and for the year ended 31 December 2017, except for new significant judgments and key sources of estimation uncertainty related to the application of IFRS 15 and IFRS 9, which are described in Note 3.

3 Changes in significant accounting policies

Except as described below, the accounting policies applied in these unaudited interim condensed financial statements are same as those applied in the Bank's financial statements as at and for the year ended 31 December 2017.

The changes in accounting policies are also expected to be reflected in the Bank's financial statements as at and for the year ending 31 December 2018.

The Bank has initially adopted IFRS 15 Revenue from Contracts with Customers and IFRS 9 Financial Instruments from 1 January 2018. A number of other new standards are effective from 1 January 2018 but they do not have a material effect on the Bank's financial statements.

A. IFRS 9 Financial instruments

The Bank has adopted IFRS 9 as issued by the IASB in July 2014 with a date of initial application of 1 January 2018. The key changes to the Bank's accounting policies resulting from its adoption of IFRS 9 are recognized below.

Classification of financial assets and financial liabilities

IFRS 9 contains three principal classification categories for financial assets: measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

On initial recognition, a financial asset is classified as measured at amortised cost, FVOCI or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:
• the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
• the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:
• the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
• the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

3 Changes in significant accounting policies (continued)

A.IFRS 9 Financial instruments (continued)

Classification of financial assets and financial liabilities (continued)

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

IFRS 9 removes the requirement contained in IAS 39 relating to bifurcation of an embedded derivative from an asset host contract. However, entities are still required to separate derivatives embedded in financial liabilities where they are not closely related to the host contract.
IFRS 9 largely retains the existing requirements in IAS 39 for the classification of financial liabilities. However, although under IAS 39 all fair value changes of liabilities designated under the fair value option were recognized in profit or loss, under IFRS 9 fair value changes are generally presented as follows:

• The amount of change in the fair value that is attributable to changes in the credit risk of the liability is presented in OCI; and
• The remaining amount of change in the fair value is presented in profit or loss.

Business model assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

• The stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets;
• How the performance of the portfolio is evaluated and reported to the Bank's management;
• The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
• How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
• The frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realised.

3 Changes in significant accounting policies (continued)

A.IFRS 9 Financial instruments (continued)

Classification of financial assets and financial liabilities (continued)

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, ‘principal’ is defined as the fair value of the financial asset on initial recognition. ‘Interest’ is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

Modifications of financial assets

If the cash flows of the modified asset carried at amortised cost are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Bank recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss.

Impairment

The Bank recognises loss allowances for (Expected credit losses) ECL on the following financial instruments that are not measured at FVTPL:
• Financial assets that are debt instruments;
• lease receivables;
• Financial guarantee contracts issued; and
• Loan commitments issued.

No impairment loss is recognised on equity investments.

The Bank measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:
• Debt investment securities that are determined to have low credit risk at the reporting date; and
• Other financial instruments (other than lease receivables) on which credit risk has not increased significantly since their initial recognition

3 Changes in significant accounting policies (continued)

A .IFRS 9 Financial instruments (continued)

Impairment (continued)

Loss allowances for lease receivables are always measured at an amount equal to lifetime ECL.
The Bank considers a debt security to have low credit risk when their credit risk rating is Equivalent to the globally understood definition of 'investment grade'.
12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Measurement of ECL

Credit loss allowances are measured using a three-stage approach based on the extent of credit deterioration since origination:
• Stage 1 – Where there has not been a significant increase in credit risk (SIR) since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to remaining term to maturity is used.
• Stage 2 – When a financial instrument experiences a SIR subsequent to origination but is not considered to be in default, it is included in Stage 2. This requires the computation of expected credit loss based on the probability of default over the remaining estimated life of the financial instrument.
• Stage 3 – Financial instruments that are considered to be in default are included in this stage. Similar to Stage 2, the allowance for credit losses captures the lifetime expected credit losses.

The key inputs into the measurement of ECL are the term structure of the following variables:
• Probability of default (PD);
• Loss given default (LGD);
• Exposure at default (EAD)

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information.

Details of these statistical parameters/inputs are as follows:
• PD – The probability of default is an estimate of the likelihood of default over a given time horizon.
• EAD – The exposure at default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date
• LGD – The loss given default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

3 Changes in significant accounting policies (continued)

A . IFRS 9 Financial instruments (continued)

Impairment (continued)

Forward-looking information

The measurement of expected credit losses for each stage and the assessment of significant increases in credit risk considers information about past events and current conditions as well as reasonable and supportable forecasts of future events and economic conditions. The estimation and application of forward-looking information requires significant judgement.

Macroeconomic factors

In its models, the Bank relies on a broad range of forward looking information as economic inputs, such as: real gross domestic product (GDP) growth and oil revenue (as % of GDP). The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are made as temporary adjustments using expert credit judgement.

Assessment of significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank’s historical experience and expert credit assessment and including forward-looking information.

The following quantitative guidelines are used to determine the staging of accounts:

1. An account will migrate to stage 2 if any of the changes in rating below are met
   - For risk grades 1 – 4: >= 3 notch downgrade
   - Risk grade 5: 2 notch downgrade
   - Risk grade 6 and 7: 1 notch downgrade
2. An account will also migrate to stage 2 if it is more than 30 days past due
3. An account will also be considered stage 2 if has been placed under special mention

In addition to the above, qualitative criteria as per the CBO guidelines (BM 1149, Para 12 (d)), for assessing the significant increase in credit risk are applicable to corporate clients with limits of OMR 500,000 or higher only.

3 Changes in significant accounting policies (continued)

A. IFRS 9 Financial instruments (continued)

Impairment (continued)

Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:
• *Financial assets measured at amortised cost:* as a deduction from the gross carrying amount of the assets;
• *Loan commitments and financial guarantee contracts:* For financial guarantee contracts and loan commitments, the loss allowance is recognised as a provision. The Bank has issued no loan commitment that are measured at FVTPL. Liabilities arising from financial guarantee and loan commitments are included within provisions under other liabilities in statement of financial position;
• *Where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component:* the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
• *Debt instruments measured at FVOCI* The debt instruments classified under FVOCI are initially recognised at fair value plus directly attributable transaction costs and subsequently measured at fair value. Gains and losses arising from changes in fair value are included in other comprehensive income within a separate component of equity. ECL or reversals, interest revenue and foreign exchange gains and losses are recognised in profit and loss. Upon disposal, the cumulative gain or loss previously recognised in other comprehensive income.

Definition of default

The Bank considers a financial asset to be in default when:
• The borrower is unlikely to pay its credit obligations to the Bank in full without recourse by the Bank to actions such as realising security (if any is held); or
• The borrower is past due more than 90 days on any material credit obligation to the Bank.

Overdrafts are considered as being past due once the customer has breached an advised limit or been advised of a limit smaller than the current amount outstanding.

In assessing whether a borrower is in default, the Bank considers indicators that are:
• Qualitative – e.g. breaches of covenant;
• Quantitative – e.g. overdue status and non-payment on another obligation of the same issuer to the Bank; and
• based on data developed internally and obtained from external sources.

Inputs into the assessment of whether a financial instrument is in default and their significance may vary over time to reflect changes in circumstances.

The Bank follows the definition of default as stipulated in CBO guidelines (BM 977 and subsequent).

3.Changes in significant accounting policies (continued)

A. IFRS 9 Financial instruments (continued)

Hedge accounting

IFRS9 introduces a new hedge accounting model that expands the scope of hedged items and risks eligible for hedge accounting and alignes hedge accounting more closely with risk management objectives and strategy with more qualitative approach to assess hedge effectiveness. IFRS9 also introduces new requirements on rebalancing hedge relationships and prohibiting voluntary discontinuation of hedge accounting.

The Bank has entered into interest rate swaps to hedge the variability in cash flows arising from changes in interest rates relating to investments. The types of hedge accounting relationships that the Bank currently designates meet the requirements of IFRS 9 and are aligned with Bank's risk management strategy and objective.

Based on Bank's assessment, there is no impact from the adoption of new standard on hedge accounting.

Transition

Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively, except as described below.

• Comparative periods have not been restated. Differences in the carrying amounts of financial assets and financial liabilities resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at 1 January 2018. Accordingly, the information presented for 2017 does not reflect the requirements of IFRS 9 and therefore is not comparable to the information presented for 2018 under IFRS 9.

• The following assessments have been made on the basis of the facts and circumstances that existed at the date of initial application.

- The determination of the business model within which a financial asset is held.
- The designation and revocation of previous designations of certain financial assets and financial liabilities as measured at FVTPL.
- The designation of certain investments in equity instruments not held for trading as at FVOCI.
- For financial liabilities designated as at FVTPL, the determination of whether presenting the effects of changes in the financial liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss.

• If a debt security had low credit risk at the date of initial application of IFRS 9, then the Bank has assumed that credit risk on the asset had not increased significantly since its initial recognition.

For more information and details on the changes and implications resulting from the adoption of IFRS 9, see below:

3.Changes in significant accounting policies (continued)

A.IFRS 9 Financial instruments (continued)

Transition (continued)

(a)The following table reconciles the original measurement categories and carrying amounts in accordance with IAS 39 and the new measurement categories with those under IFRS 9 for the Bank's financial assets and financial liabilities as at 1 January 2018.

				Impact of IFRS 9		
	Original classification under IAS 39	New classification under IFRS 9	Original carrying amount	Re-measure-ment	Re-classifica-tion	New carrying amount
Financial assets						
Cash and balances with central banks	Loans and receivables	Amortised cost	326,819	-	-	326,819
Due from banks	Loans and receivables	Amortised cost	299,896	(1,287)	-	298,609

B. IFRS 15 Revenue from Contract with Customers

IFRS 15 was issued in May 2014, and amended in April 2016, and establishes a five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The new revenue standard will supersede all current revenue recognition requirements under IFRS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after 1 January 2018. Early adoption is permitted. The Bank plans to adopt the new standard on the required effective date using the modified retrospective approach. The Bank has performed an initial impact assessment and concluded that the impact is not material as in majority of the Bank’s facility agreements with customers generally expected to be the only performance obligation and accordingly, adoption of IFRS 15 is not expected to have any impact on the Bank’s income and profit or loss.

NOTES TO THE INTERIM CONDENSED FINANCIAL STATEMENTS
FOR THE SIX MONTH PERIOD ENDED 30TH JUNE 2018

4 Standards issued but not yet effective

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2019 and earlier application is permitted; however, the Bank has not early adopted them in preparing these unaudited interim condensed financial statements.
The Bank has the following updates to information provided in the last annual financial statements about the standards issued but not yet effective that may have a significant impact on the Bank's financial statements.

IFRS 16 Leases

The IASB issued IFRS 16 Leases (IFRS 16), which requires lessees to recognized assets and liabilities for most leases. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). For lessors, there is little change to the existing accounting in IAS 17 Leases. The Bank will perform a detailed assessment in the future to determine the extent. The new standard will be effective for annual periods beginning on or after 1 January 2019. IFRS 16 also requires lessees and lessors to make more extensive disclosures than under IAS 17. In 2018, the Bank will continue to assess the potential effect of IFRS 16 on its financial statements.

5. Cash and balances with Central Bank of Oman

	Unaudited 30 June 2018 RO'000	Unaudited 30 June 2017 RO'000	Audited 31 December 2017 RO'000
Cash in hand	**31,749**	37,048	30,085
Balances with the Central Bank of Oman	**162,265**	71,613	240,909
Placements with Central Bank of Oman	**86,240**	83,160	55,825
	280,254	191,821	326,819

At 30 June 2018 cash and balances with Central bank of Oman included balances with the Central Bank of Oman amounting to RO 500,000 (30 June 2017- RO 500,000 and 31 December 2017 – RO 500,000) as minimum reserve requirements. These funds are not available for the Bank's daily business.

6. Loans, advances and financing to banks

	Unaudited 30 June 2018 RO'000	Unaudited 30 June 2017 RO'000	Audited 31 December 2017 RO'000

* Net of provision and reserve interest as per CBO norms

In accordance with Central Bank of Oman (CBO) circular BM 1149, the mandatory regulatory impairment reserve is created when the provisions and reserve interest required as per CBO norms exceeds the impairment allowance as per IFRS. The impairment reserve is a yearly appropriation from the net profit after tax. The regulatory impairment reserve will not be available for payment of dividend or for inclusion in regulatory capital. Any subsequent utilisation of the impairment reserve would require prior approval of the CBO.

Interest is reserved by the Bank against loans and advances which are impaired.

Out of the total provisions of RO 124,424 thousand (30th June 2017 – RO 128,408 thousand, 31 December 2017 - RO 137,952 thousand), a collective provision was recorded on a portfolio basis amounting to RO 38,629 thousand as of 30th June 2018 (30th June 2017 - RO 42,163 thousand) 31 December 2017 - RO 43,197 thousand).

At 30th June 2018, impaired loans and advances on which interest has been reserved amount to RO 111,865 thousand (30th June 2017 – RO 95,356 thousand, 31 December 2017 - RO 105,503 thousand) and loans and advances on which interest is not being accrued amount to RO 1,702 thousand (30th June 2017 - RO 1,338 thousand, 31 December 2017 – RO 1,578 thousand).

The provision made for non-funded facilities during the year of RO 10.95 thousand is included in other liabilities. for loans and advances to Bank RO 0. 860 thousand and Investment RO 0.234thousand

17. Earnings per share (basic and diluted)

The calculation of basic and diluted earnings per share is based on profit for the six month period ended 30th June 2018 attributable to ordinary shareholders as follows:

	Unaudited 30th June 2018	Unaudited 30th June 2017
Profit for the period (RO)	**24,949**	22,694
Less : Additional Tier 1 Coupon	**(3,956)**	(3,956)
Profit for the period attributable to equity holders of the bank after coupon and issuance cost on Tier 1 capital securities	**20,993**	18,738
Number of shares outstanding at the end of the period	**2,324,448,732**	2,108,232,516
Earnings per share basic and diluted (RO)	**0.009**	0.009

NOTES TO THE INTERIM CONDENSED FINANCIAL STATEMENTS FOR THE SIX MONTH PERIOD ENDED 30TH JUNE 2018

17. Earnings per share (basic and diluted) (continued)

Earnings per share (basic and diluted) have been derived by dividing the profit for the period attributable to equity holders of the bank after coupon on Tier I capital securities by the number of shares outstanding. As there are no dilutive potential shares issued by Bank, the diluted earnings per share is identical to the basic earnings per share.

For the purpose of earning per share calculation, the Bank has restated the previous year weighted average number of shares outstanding to include the 8% bonus shares of 180,628,618 shares issued in the first quarter of 2018.

18. Related parties transactions

In the ordinary course of business, the Bank conducts transactions with certain of its Directors, shareholders and companies over which they are able to exert significant influence. The aggregate amounts of balances with such related parties are as follows:

21. Capital risk management

The Bank manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders within acceptable risk return framework. The Bank's overall strategy remains unchanged from prior year.

The capital base of the Bank consists of debt, which includes borrowings and equity attributable to shareholders of the Bank comprising issued share capital, share premium, reserves and retained earnings.

NOTES TO THE INTERIM CONDENSED FINANCIAL STATEMENTS
FOR THE SIX MONTH PERIOD ENDED 30TH JUNE 2018

Capital adequacy

The ratio of equity to risk weighted assets, as formulated by the Basel II and Basel III, for six month period ended 30th June 2018 is 14.09**%** (30th June 2017 – 14.89%, 31 December 2017 – 15.44%).

FOR THE SIX MONTH PERIOD ENDED 30TH JUNE 2018

21. Capital risk management (continued)

Capital adequacy (continued)

As per CBO circular BSD/2018/1 dated 20 June 2018, minimum capital adequacy ratio requirement has been reduced by 1% with effect from 1 April 2018. As per new ratio, Tier 2 capital will be restricted to 2% from 3%. CET 1, Tier 1 and capital conservation buffer requirements remained unchanged.

The adoption of IFRS 9 as disclosed in note 3 reduced the total Capital Adequacy Ratio of the Bank by 0.57% as of 30th June 2018. Had the Bank not adopted IFRS 9, total Capital Adequacy Ratio would have been 14.66% instead of 14.09% and Common Equity Tier 1 (CET 1) Capital Adequacy Ratio would have been 10.36% instead of 10.32% as of 30th June 2018.

22. Fair value information

The fair values of all on and off-balance sheet financial instruments at reporting dates are considered by the Board and Management not to be materially different to their book values and the related details are set out below:

22. Fair value information (continued)

Fair value measurements recognised in the statement of financial position

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At 30th June 2018	**Level 1**	**Level 2**	**Level 3**	**Total**
	RO'000	**RO'000**	**RO'000**	**RO'000**

Total assets	22,498	13,314	-	35,812

Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index process and expected price volatilities and correlations.

Observable prices or model inputs are usually available in the market for listed debt and equity securities, exchange-traded derivatives and simple over-the-counter derivatives such as interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgment and estimation and also reduces the uncertainty associated with determining fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

22. Fair value information (continued)

23. Segmental information

The Bank is organised into three main business segments:

a) Retail banking – incorporating private customer current accounts, savings, deposits, investment savings products, custody, credit and debit cards, consumer loans and mortgages;

b) Corporate banking – incorporating direct debit facilities, current accounts, deposits, overdrafts, loan and other credit facilities, foreign currency and derivative products; and

c) Treasury and investments

Other operations comprise investment management and institutional finance neither of which constitutes a separately reportable segment.

Transactions between the business segments are on normal commercial terms and conditions. Funds are ordinarily allocated between segments, resulting in funding cost transfers disclosed in operating income. Interest charged for these funds is based on the Bank's cost of capital. There are no other material items of income or expense between the business segments.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of the statement of financial position, but exclude items such as taxation and borrowings.

23. Segmental information (continued)

Internal charges and transfer pricing adjustments have been reflected in the performance of each business. Revenue sharing agreements are used to allocate external customer revenues to a business segment on a reasonable basis.

Included in the segment information the consolidated results of the Bank as below:

At 30th June 2018	**Retail banking RO'000**	**Corporate banking RO'000**	**Treasury and investments RO'000**	**Total RO'000**
